

PrintKey Configuration

Copy printkey.exe into startup menu

Delete or copy printkey.exe that is on desktop to a directory on server for safekeeping

From startup menu double click printkey.exe

It will appear as if it did not run but it is task bar on right

Right click the printkey.exe icon(finger touching key)

 'No Dialog' should be checked

Right click the printkey.exe again

 Click 'Open'

 Click 'Printer Options ' tab

 Selected Printer

 Default printer is windows default printer or choose printer to print to

 Then click 'options' at top menu

 Define Hotkey select PrintScrn

 Define Hotkey function should be

 HotKey = (Active Window) Alt+HotKey(Desktop)

On that same menu select:

 Auto Copy to clipboard

 Get only Client Area

 No Dialog

When done

 Click File then Close

Now to print screen all you have to do is press print scrn key on keyboard when you have the window open that you want to print.
